DETAILED ACTION

Claims 1-45 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 and 37, line 1 and line 3, respectively, an abbreviation is set forth as "CHTS" which is vague and indefinite due to lacking citation therewith of a full name for clarity. Clarification via clearer claim wording is requested.

In claim 1, line 1, the method is directed to CHTS experimentation but only an array is cited in line 2. Also, there is no High throughput limitations in the actual claim steps. Thus, it is unclear whether the preamble or the actual claim steps control the metes and bounds of the claim. Clarification via clearer claim wording is requested.

Claim 43, line 8, is vague and indefinite as to whether a single defect is meant or multiple defects due to the phrase "a defects". Clarification via clearer claim wording is requested.

Claims dependent from claims 1, 37, or 43 directly or indirectly also contain the above unclarities due to their dependence.

PRIOR ART

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Art Unit: 1631

Claims 1-3, 6, 37, and 43 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Eustace et al.

Eustace et al. is supplied as to its abstract which clearly sets forth an array of gelatin-water solutions which are subjected to experimentation with the usage of six sigma tools as also cited in the instant claims.

No claim is allowed.

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission.
